## Introduction

# Global Data Feeds now supports to NinjaTrader version 8 – 32 & 64 bit

Global Data Feeds FREE Trial for NinjaTrader 8 - 32 & 64 Bit.

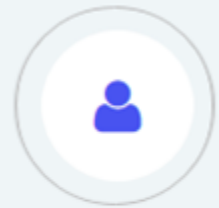

### 1. Import

Download & Import

### 2. Register

Register & Activate Trial  
when used 1 time in NT8

### 3. Connect

Add Symbols to view  
Charts

**Minimum Requirement :**

- NinjaTrader 8.0.3.1 (32 or 64 bit)
- Dotnet 4.0
- Supported Operating Systems : as supported by NinjaTrader 8
- If you are behind firewall, you will need to open port 4531, 4525, 943
- You will need to grant 'all access' to our applications through your Windows Firewalls, Anti-virus, external firewalls installed by your Anti-virus programs

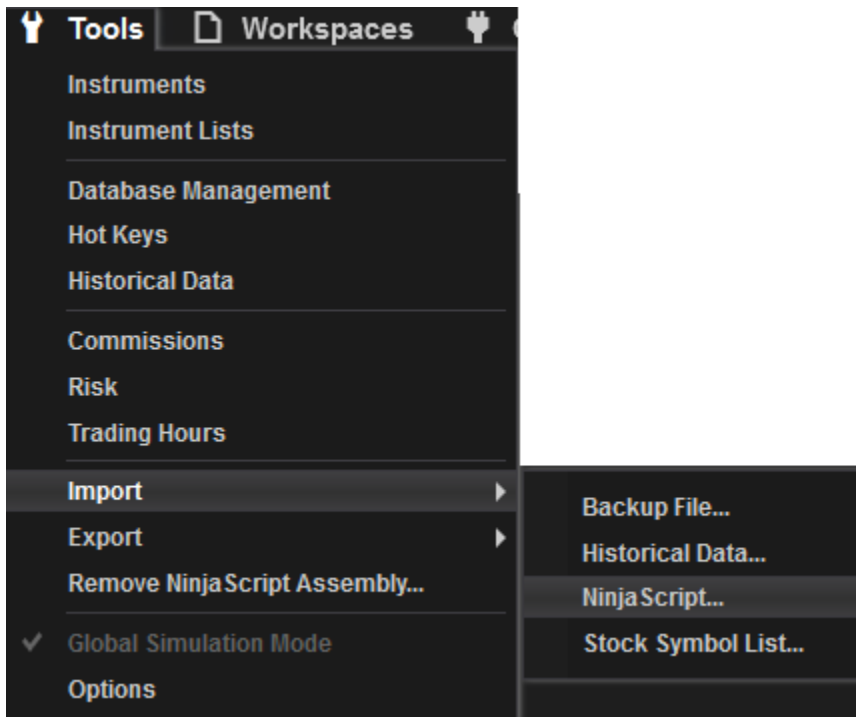

**Download Plugin :**

Download NinjaTrader 8 plugin from our website.

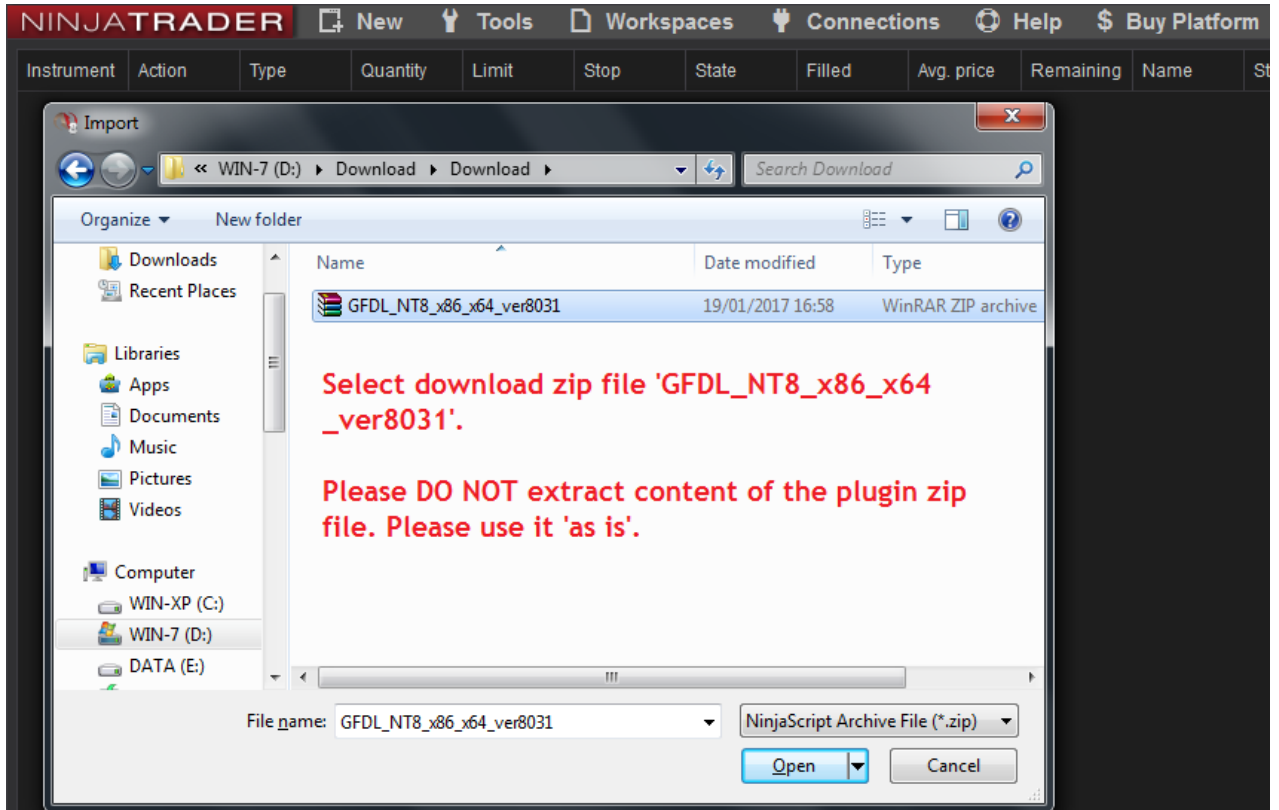

**Important :**

- This plugin will support NinjaTrader 32 bit as well as 64 bit.
- Plugin is a zipped file. Please use it 'as is'. DO NOT extract contents of the plugin zip file.

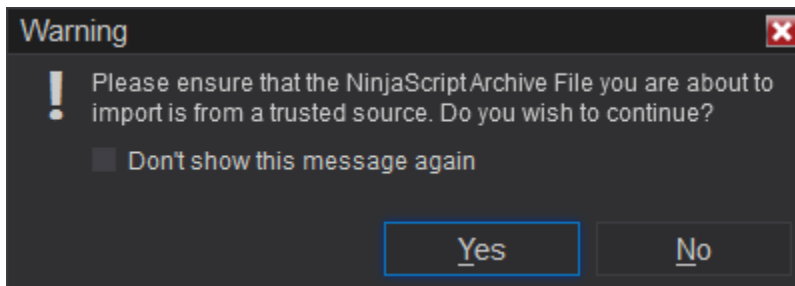

Start NinjaTrader 8. Goto menu Tools >> Import >> NinjaScript :

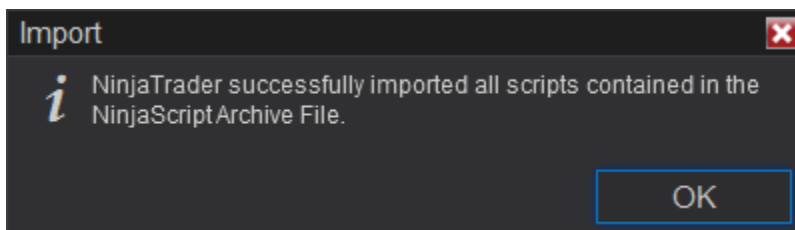

Select & Import the zip file as per below screenshot :

Click on Yes button

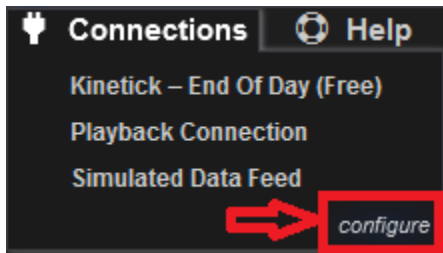

Click on OK button.

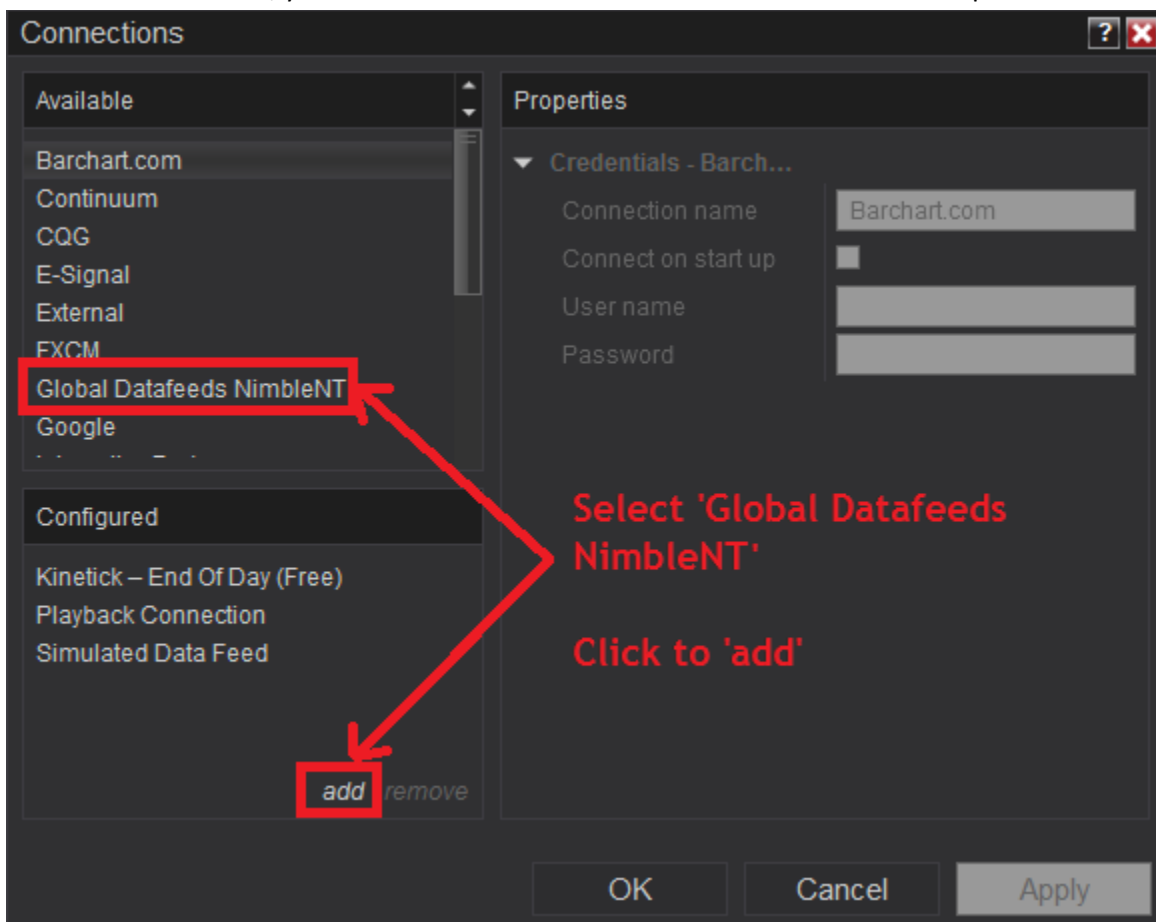

## Connection

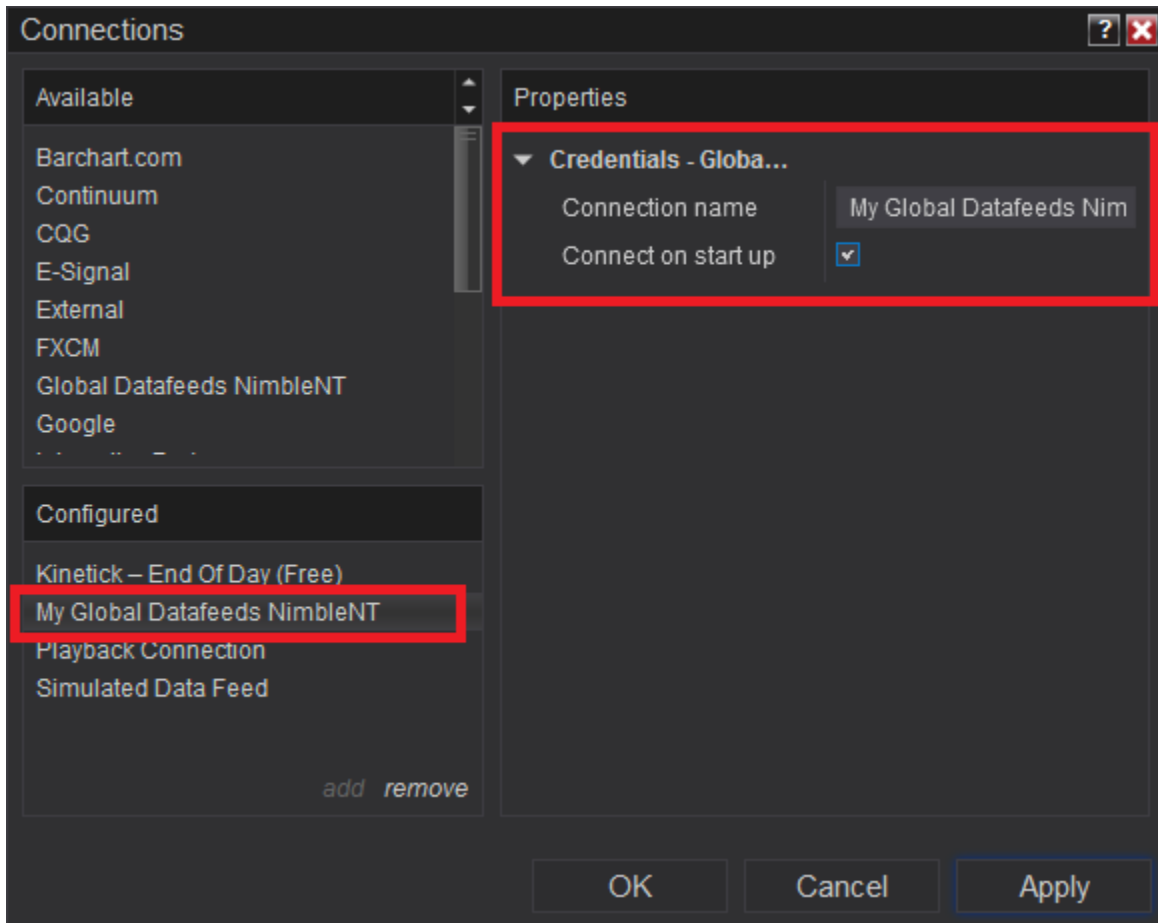

After successfully importing the plugin, now we can configure the datafeed connection 'Global Datafeeds NimbleNT'. For this, go to menu **Connections** and click on **Configure** as per below screenshot :

In connection window, you need to select 'Global Datafeeds NimbleNT' & add as per below screenshot :

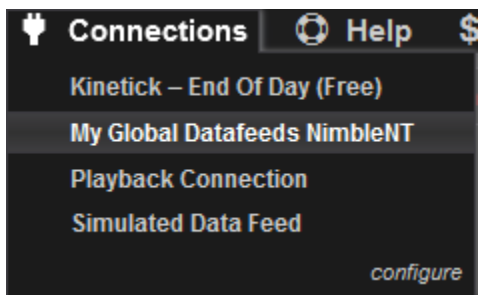

After adding, you can see 'Global Datafeeds NimbleNT' in configured option.

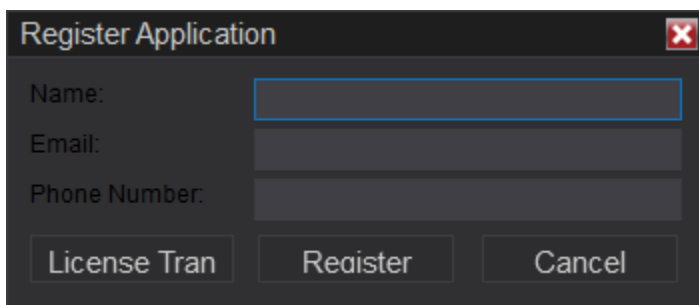

## Registration

After configuration, you can see 'My Global Datafeeds NimbleNT' in menu Connections. Click on it to connect.

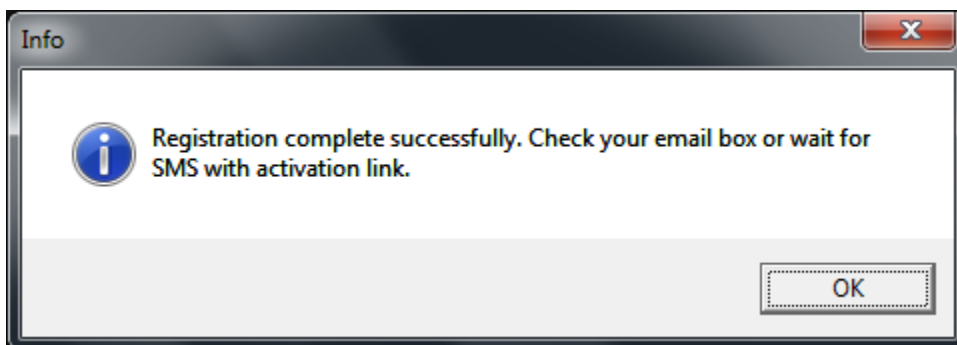

For fresh users, it will ask for registration after making a connection to our server. Registration is one time activity. For registration, you need to enter Name, Email & Phone Number.

Activation link is sent over email. Please enter valid email Id to receive activation link. Data product will not work without activation

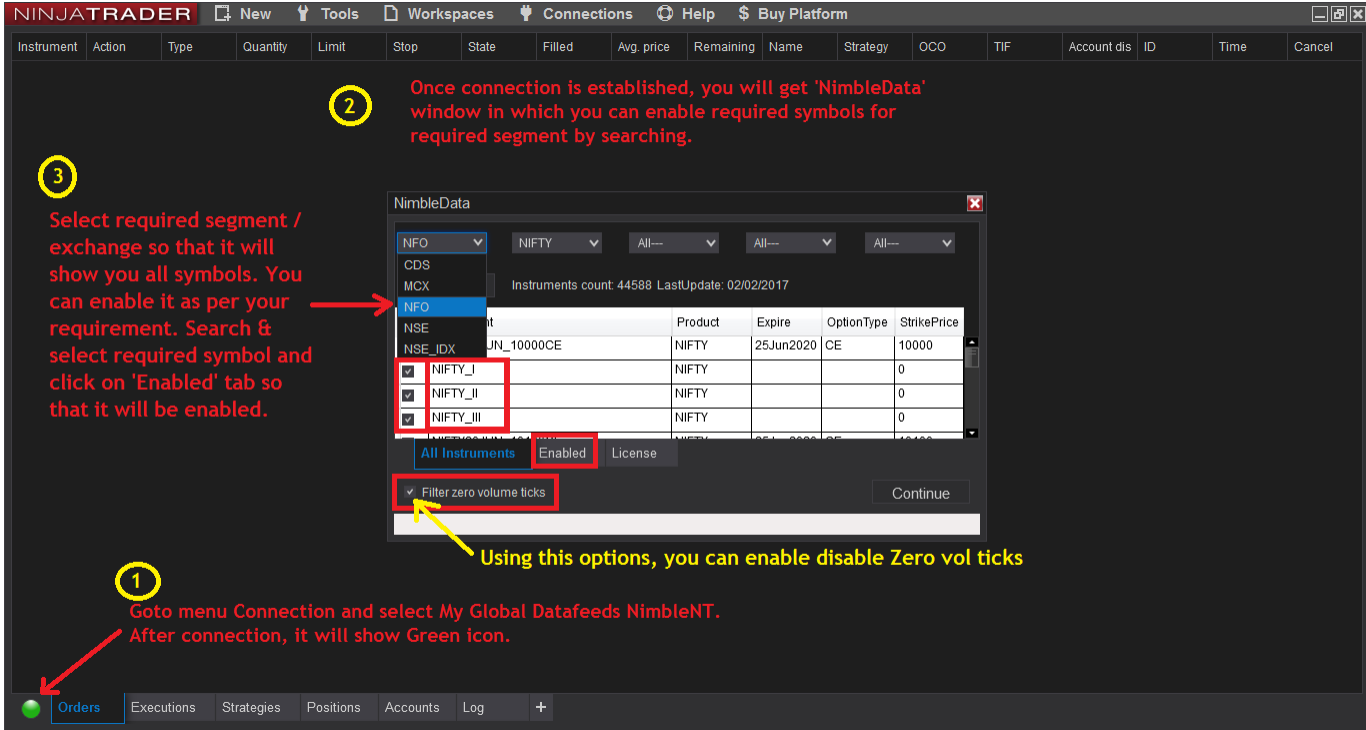

Once Registered, it will show you message as per below screenshot.

Please check your email at this stage. You should receive a mail from us with activation link. Please click on the link received to activate your copy of the data product. After activation, restart NinjaTrader 8.

Please check inbox / spam folder for our activation email. Sometimes, our mail may land in SPAM folder.

After restart, click on menu **Connections >> My Global Datafeeds NimbleNT**. After connection, it will show you 'Nimbledata' Dashboard. Here, you can see supported and subscribed exchanges with symbols for each exchange. You may select exchange / segment and search required symbol. Once desired symbol is found, select it and enable it.

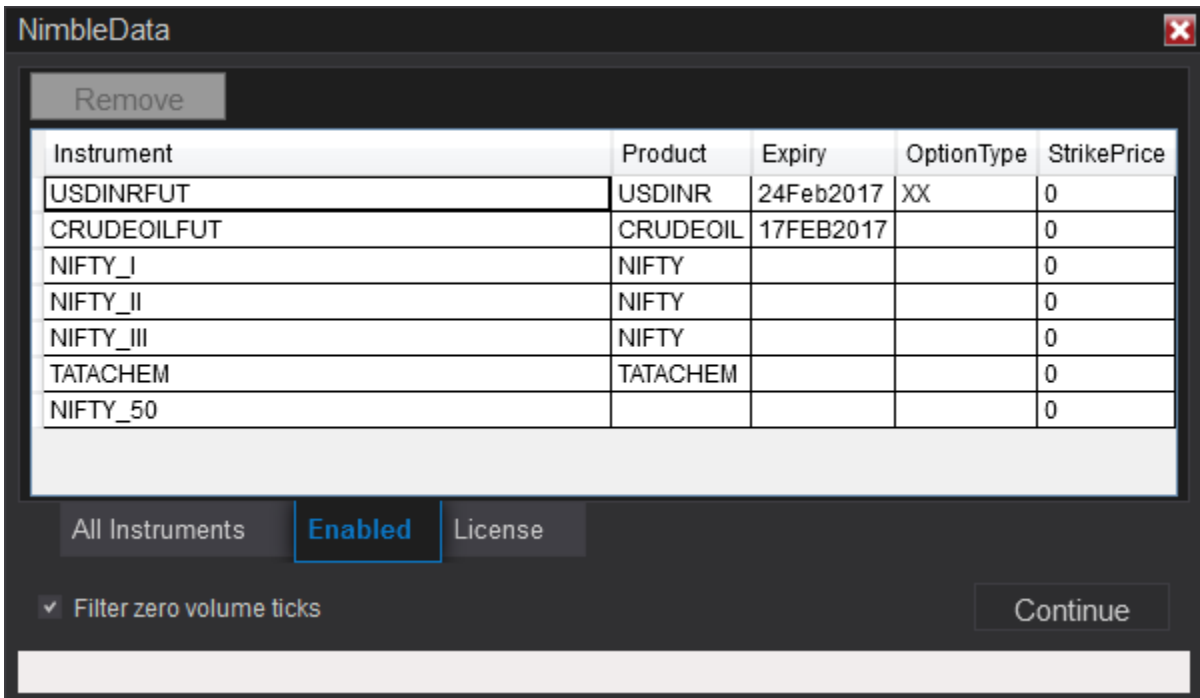

**1** Goto menu Connection and select My Global Datafeeds NimbleNT. After connection, it will show Green icon.

**2** Once connection is established, you will get 'NimbleData' window in which you can enable required symbols for required segment by searching.

**3** Select required segment / exchange so that it will show you all symbols. You can enable it as per your requirement. Search & select required symbol and click on 'Enabled' tab so that it will be enabled.

Using this options, you can enable/disable Zero vol ticks

In Enabled tab, you can view all enabled symbols. Click on 'Continue' button.

User Information :

The screenshot shows a window titled "NimbleData" with a close button in the top right corner. The window contains a form with the following fields:

User Name	XYZ	License Transfer
Email	xyz@gmail.com	
Appld	8FCO-XXXX-6B38	
Expire	2/28/2017	

Below the form, there are three buttons: "All Instruments", "Enabled", and "License". The "License" button is highlighted with a blue border. At the bottom left, there is a checkbox labeled "Filter zero volume ticks" which is checked. At the bottom right, there is a "Continue" button.

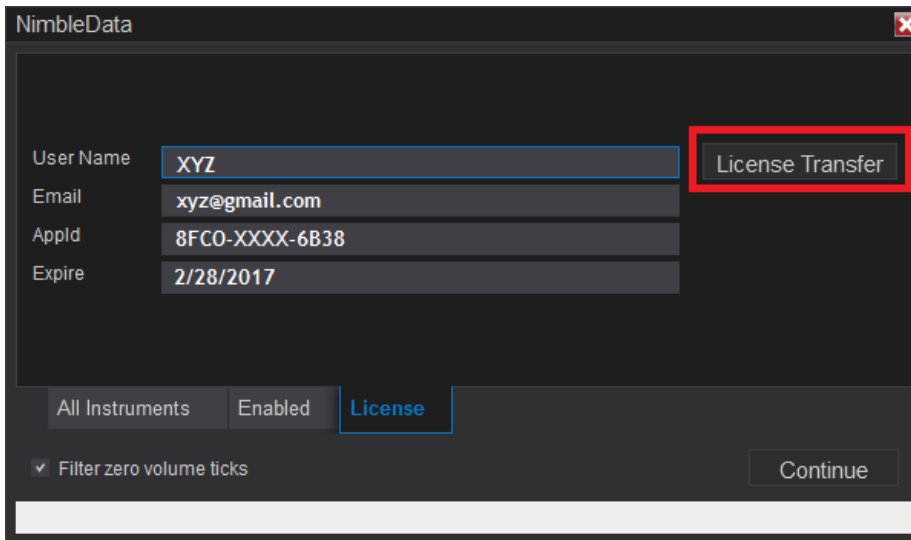

License Transfer :

To use NimbleNT, each user must register before he can use the product (paid as well as trial user). Registration is a one time process and it creates a license for the user. Whenever user wants to use NimbleNT on another computer, he will need to transfer his license to another computer. In NimbleNT, license transfer is fully automatic.

**Planned License Transfer :** Here, user first deactivates his license from existing computer. Then he installs / runs NimbleNT on another computer and activates NimbleNT. The steps are :

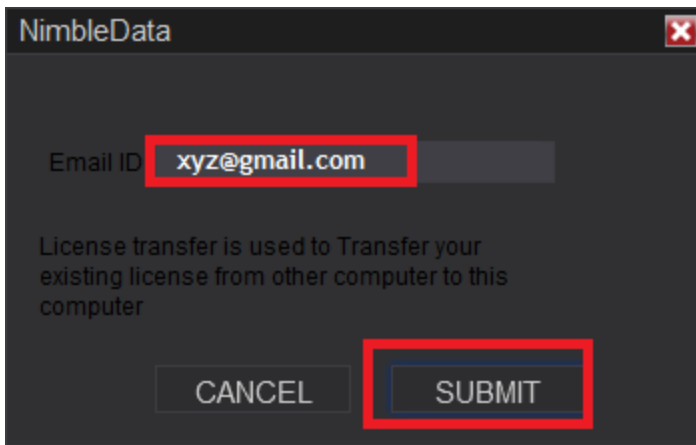

- Click on 'License Transfer' button as shown below.

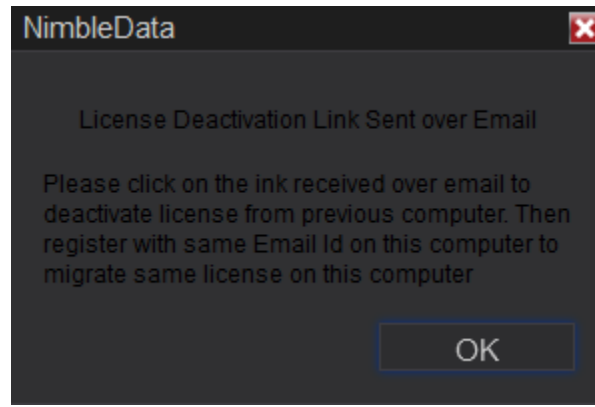

The image shows a 'NimbleData' dialog box with a dark background. It contains a form with the following fields: 'User Name' with the value 'XYZ', 'Email' with 'xyz@gmail.com', 'AppId' with '8FC0-XXXX-6B38', and 'Expire' with '2/28/2017'. To the right of the 'User Name' field is a button labeled 'License Transfer', which is highlighted with a red rectangular box. Below the form are three tabs: 'All Instruments', 'Enabled', and 'License', with the 'License' tab selected. At the bottom left, there is a checked checkbox labeled 'Filter zero volume ticks'. At the bottom right, there is a 'Continue' button.

- Verify the registered email Id and click on 'SUBMIT' button.

The image shows a 'NimbleData' dialog box with a dark background. It contains a form with the following fields: 'Email ID' with the value 'xyz@gmail.com', which is highlighted with a red rectangular box. Below the form, there is a text block: 'License transfer is used to Transfer your existing license from other computer to this computer'. At the bottom, there are two buttons: 'CANCEL' and 'SUBMIT', with the 'SUBMIT' button highlighted by a red rectangular box.

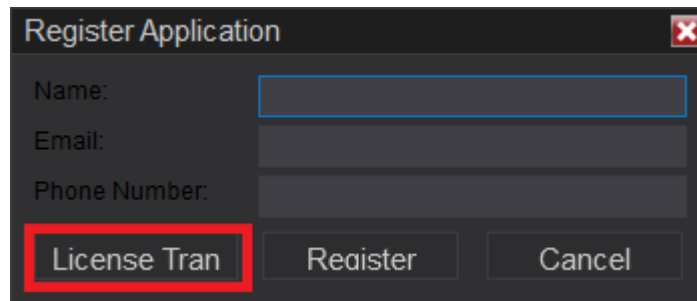

- Once submitted, a deactivation link will be sent to your registered email id – as shown below.

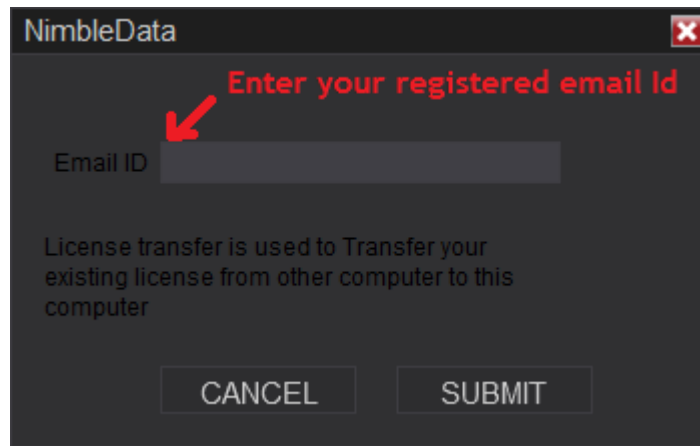

- Click on the deactivation link received over email. Once clicked, your license will be deactivated from current computer.
- Once license is deactivated, you can activate it on any computer (including old computer) by following registration process as explained under Configuration above.
- **Important** : Use same email id as used on the old computer to register on new computer. This will map your subscription settings on your new computer automatically.

**Unplanned License Transfer** : Here user is not near his regular computer where NimbleNT is installed but he wants to use NimbleNT on another computer. Here are the steps he should follow.

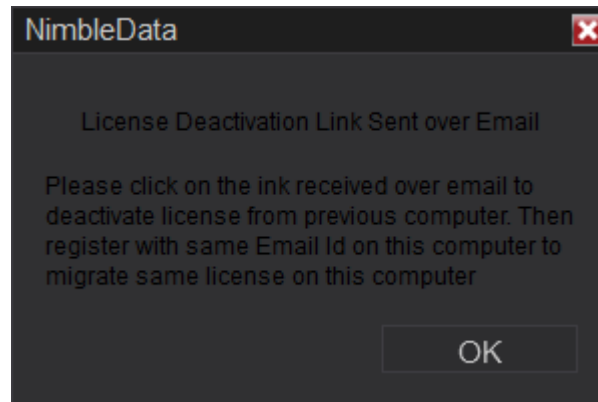

- Install NimbleNT on new computer as explained under installation above.
- Install & configure NimbleNT on new computer as explained under Configuration above.
- Click on 'License Transfer' button in the registration dialog as shown below.

- Enter your registered email Id and click on 'SUBMIT' button.

- Once submitted, a deactivation link will be sent to your registered email id – as shown below.

- Click on the deactivation link received over email. Once clicked, your license will be deactivated from old computer. You can now use it on current computer.
- Now follow registration process from step under Configuration. Register NimbleNT on new computer.
- **Important** : Use same email id as used on the old computer to register on new computer. This will map your subscription settings on your new computer automatically.

**Thank you very much....**
